Dr. Peter McCullough on COVID Treatments, and Why CDC, FDA Shouldn't Make Recommendations

On the premier episode of "Doctors and Scientists" on CHD Live!, Dr. Peter McCullough told viewers the National Institutes of Health, Centers for Disease Control and Prevention and U.S. Food and Drug Administration are supposed to serve doctors and patients — not make treatment recommendations.

On the premier episode of "Doctors and Scientists" on CHD Live!, host Brian Hooker, Ph.D., P.E., interviews Dr. Peter McCullough about the U.S. government's response to the current public health crisis.

McCullough, one of the premier physicians focused on the early treatment of the COVID-19, has published 46 peer-reviewed papers on COVID.

"Dr. McCullough is a hero of mine," said Hooker, Children's Health Defense chief scientific officer and professor of biology at Simpson University.

The two discussed various treatment options, including ivermectin and hydroxychloroquine, both of which are increasingly difficult to get prescriptions for, even though, according to McCullough, doctors are free to prescribe them and pharmacies don't have the right to refuse to fill a patient's prescription.

ORDER TODAY: Robert F. Kennedy, Jr.'s New Book — 'The Real Anthony Fauci'

In response to Hooker's question about why people who seek these prescriptions are maligned, McCullough said, "Fear plays a major role in influencing mass psychology."

McCullough reminded viewers that the National Institutes of Health, Centers for Disease Control and Prevention and U.S. Food and Drug Administration are government public service agencies that serve doctors and patients.

"These agencies don't treat patients," McCullough said. "They are supposed to serve us … not

make treatment recommendations."

McCullough recommended viewers check out these four organizations for information on COVID treatments: the Association of American Physicians and Surgeons, America's Frontline Doctors, Front Line Critical Care Consortium and Truth for Health Foundation.

"These are the trustworthy sources for what drugs work, and how to use them," McCullough said.

Watch this week's episode here:

Tune in every Thursday at 9 a.m. PT / Noon ET to watch a new episode of "Doctors and Scientists" on CHD TV.

If the CDC defines "Vaccinated" as persons who have reached the 14 day mark after the completion of either their one dose or two dose C19 injection regimen, then the CDC is putting 80% of the C19 injection deaths onto the unvaccinated, and creating the illusion of C19 injection safety.
Same story. Different year.

ME MCC Siobhan Justin • an hour ago

21 days between the 2 shots and 2 weeks after the second shot...only then are you considered fully vaxxed. Results don't matter if there is an adverse event because if you fall within these 5 weeks, you are considered unvaxxed.

Dr. McCullough mistakenly calls FLCCC the "Frontline Covid Critical Care Consortium" when they are really the Frontline Covid Critical Care Alliance, and can be found at FLCCC.net. No big deal, but it could cause confusion. Very grateful for Dr McCullough's work and brave stance.

John Travis ↗ Ice skater • 6 days ago

Their website confirms McCullough has it right. There's no "Alliance" of "Covid" in their name. And Front Line is two words.

McCullough points out that Remdesevir has liver and kidney toxicity. Well done, Dr. McCullough. The trial that was done to justify EUA for Remdesevir showed no benefit for mortality, yet it is used by almost all hospital system, even Mayo Clinic.

my daughter given remdesivir at Inova of Louden county. Got blood clots Flown to Inova of Fairfax. At Loudan given Ivermectin that seemed to help. At Fairfax, they refused. same hospital org. Pleaded, they refused.
Blood clots caused stroke. Now paralyzed on right side.. Said she would die. Came out of coma. opened eyes, and is responsive. Any body have a solution in med field what I can do or turn to. my e mail lor44etta@yahoo.com pls. I am desperate,.

There are a number of therapies suggested for some recovery, including blood thinners? Do get more Ivermectin OTC (from Mexico or India) or ASAP from another progressive Dr. in USA. It seems to reduce a lot of horrendous side effects, post-vaccine, in several patients (saw some videos-stunning! Some injured patients went from paralyzed to walking up the stairs!). It's miraculous & truly Safe. No wonder it

won a Nobel Prize!!-

WOW ! What an enlightening episode of this new scientific serie "Doctors and Scientists" on CHD TV : Dr Peter McCullough mediates his clear insights into subjects I have previously heard about, but lacked in understanding of. Professor Brian Hooker leads the interview such that it is easy to follow and covers many of the essential subjects we need to understand better. I look forward to his coming episodes in a serie that imo could not have had a better start !

McCullough goes about as far as he can in criticizing the vaccines without getting into serious concerns with licensing boards.
2 ^ | v • Reply • Share ›

Bill Rood • 13 days ago

It would be helpful if CHD would provide a speedup function for these videos. I watch most videos at 1.5x normal speeds.

Penny Olson • 10 days ago

I know this was primarily a treatment & vaccine discussion but it would have been nice to have natural immunity addressed as well. Thank you.

GBR • 12 days ago

It would be helpful to have access to a list of physicians or clinics that are treating at diagnosis in specific areas of the country.

It is all fine, but useless, since not available, censored, banned and radiculed by medical tyrants in Canada. No doctor will dare to prescribe, no pharmacy will dispense these medications. What one can still buy , is Zn, Quartcetin and NAD in health food stores.
As for vaccines, I am confused as to what circulates and is more detrimental: nanoparticles or produced s-proteins. Dr. Bridle talked about biodistribution of s-proteins, correct me if I am wrong.

>
> Just in case someone wants to look up the supplements you mentioned that are sold in health food stores, the correct spelling would be Quercetin, NAC (N-Acetyl Cysteine) and Zn is Zinc.
> Might help if someone searches for them.

HERE IS ALL YOU NEED TO DO TO MAKE YOUR VERY OWN HYDROXYCHOROQUINE!

TAKE THE RIND OF 2-3 LEMONS, 2-3 GRAPEFRUITS. TAKE THE PEEL ONLY AND COVER IT WITH WATER ABOUT 3 INCHES ABOVE THE PEELS. PUT A GLASS LID ON YOUR POT IF YOU HAVE ONE, A METAL ONE IS FINE IF YOU DON'T.

15. LET IT SIMMER FOR ABOUT 2 HOURS. DO NOT TAKE THE LID OFF OF THE POT TILL IT COOLS COMPLETELY AS THIS WILL ALLOW THE QUININE TO ESCAPE IN THE STEAM.

16. SWEETEN THE TEA WITH HONEY OR SUGAR SINCE IT WILL BE BITTER. TAKE 1 TABLESPOON EVERY COUPLE OF HOURS TO BRING UP THE PHLEGM FROM YOUR LUNGS. DISCONTINUE AS SOON AS YOU GET BETTER.

17. PLEASE SHARE THIS WITH THOSE THAT NEED TO REDUCE FEAR AND ALLOW THEM TO SEE THAT GOD IN ALL OF HIS GLORY, PROVIDES US WITH ALL THAT WE NEED.
